The Naval Research Laboratory has a new requirement for Labor, Engineering and Computer Analysis Support for Builder Developer Tool Set for the Counter Radio-controlled Improvised Explosive Devices Electronic Warfare C-Mast Program.

Required areas of support include: (1) radio frequency use and propagation and analysis of temporal and spatial patterns, (2) new technologies relating to the field of RF, (3) modeling and simulation in the area of electronic warfare, (4) situational awareness and threat assessment in air and surface domains, (5) RF related software and tools, (6) software engineering, (7) RADAR systems, and (8) jammers. The anticipated period of performance will be a basic award of twelve months and four 12-month options, if exercised. The anticipated level of effort is 11,520 hours for the basic contract and 11,520 hours each for all options, if exercised. It is anticipated that only one award will result from this solicitation. NRL uses Electronic Commerce (EC) to issue Requests for Proposals (RFPs) and amendments to RFPs. Paper copies of the RFP will not be provided. This is not a solicitation. The actual closing date for proposals will be stated in the solicitation when issued.

All responsible sources may submit a bid, proposal, or quotation which shall be considered by the agency.
