Added: Mar 09, 2009 3:18 pm

This is a

combined synopsis/solicitation for commercial items prepared in accordance with the format in Federal Acquisition Regulations (FAR) Subpart 12.6, as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; proposals are being requested and a written solicitation will not be issued. The solicitation, N00173-09-R-SE02, is issued as a Request for Proposal (RFP). The solicitation

document and incorporated provisions and clauses are those in effect through FAC 2005-30 and DFARS Change Notice 20090115. The associated small business size standard is 750 employees. NRL has a requirement for: CLIN 0001- one each X-Y Positioner System for use in a government anechoic chamber. The X-Y Positioner System will be part of a closed-loop simulation facility in which an RF receiver is mounted on a flight table and RF signals are transmitted from two standard gain horns at one end of the chamber. The horns are positioned on a two dimensional surface by the X-Y positioner System. The horn orientation can be achieved through two means; 1) the rails on which the horns move are curvilinear with a radius of curvature and 2) The rails on which the horns move are straight liner and the squint angle for the horns is dynamically adjusted. The system includes rails, horns, motors, computers, cabling, installation, testing

and documentation and CLIN 0002 – Software. Offerors are required to provide an acceptance test plan with the proposal. The Government's anticipated budget for this procurement is \$335,000.00.
