Description

This is a combined synopsis/solicitation for commercial items prepared in accordance with the format in Federal Acquisition Regulations (FAR) Subpart 12.6, as supplemented with additional information included in this notice. This announcement constitutes the only solicitation; proposals are being requested and a written solicitation will not be issued. The solicitation, N00173-05-R-SE02, is issued as a Request for Proposal (RFP). The solicitation document and incorporated provisions and clauses are those in effect through FAC 2001-27 and DFARS Change Notice 20050113. The associated small business size standard is 500 employees. NRL has a requirement for a compact, flexible pulsed-power driver for radiography. This requirement addresses the need for a relatively low-power, high-shot-rate

radiographic source that is compact enough to be moved to different experiments as needed. This source will be used both as a diagnostic (projectile motion in rail guns, dense electrode plasmas and dense imploding loads in pulsed-power experiments) and as a test bed for further radiographic source development. Different experiments have different source requirements so that multiple radiographic heads are required. The complete specification and/or other information required for this combined synopsis/solicitation is available at <http://heron.nrl.navy.mil/contracts/listfrp.htm>. Delivery and acceptance is at NRL, Washington, D.C. 20375, FOB Destination. Delivery shall be no later than 120 days from date of award. The provision at 52.212-1, Instructions to Offerors-Commercial, applies to this acquisition. The provision at FAR 52.212-2, Evaluation--Commercial Items is incorporated. The Government intends to award a contract resulting from this solicitation to that responsible offeror whose offer conforming to the solicitation will be the most advantageous to the Government, price and other factors considered.
