

PRESCRIPTION SAFETY GLASS SPECIFICATION

The contractor shall supply the Prescription Safety Glasses in accordance with Attachment 2 and the following related information.

BACKGROUND

The glasses will be fit by the optometrist (under contract) upon their arrival at the Naval Research Laboratory. If the optometrist determines that they were not made per his written prescription, the optical company must cover the cost of remaking the glasses. If he finds that the prescription must be rewritten, the cost will be treated as a new work order. The average orders are placed every two weeks with 18 – 20 pairs of glasses ordered. Individual pairs maybe ordered.

TECHNICAL

Prescriptions are written for all types of single vision, bifocal, trifocals and progressive lens as shown in Attachment 2. The glass case will have a overlapping, Velcro closure and belthook. Colors: black or brown.

The contractor must provide frames in a choice of TITMUS TR306S, TR301S, and TR304S.

APPLICABLE DOCUMENTS AND STANDARDS

The safety glasses must comply with ANSIZ87.1-2003 and Z87-2 Safety Standards

WARRANTIES

The contractor must provide a standard commercial warranty as provided to the public.
