

Government Furnished Material

The government will provide the following materials to the contractor on the dates specified in the paragraphs below.

Coarse Sun Sensors

The government will provide up to 4 Coarse sun sensors six (6) months after receipt of order (ARO) if the government determines a need for them. The government will be responsible for the shipment of the sensors to the contractor. The contractor shall be responsible for attaching the sensors to the substrate and routing the harness from them to the SADA electrical interface.

Blocking Diodes

The government will provide 100 blocking diodes four (4) months after receipt of order (ARO). The diodes will be JANTXV1N5550 diodes. The government will be responsible for the shipment of the diodes to the contractor.

Temperature Sensors

The government will provide 12 temperature sensors four (4) months after receipt of order (ARO). The sensors will be Rosemount 118BDT thermistors. The government will be responsible for the shipment of the temperature sensors to the contractor.
