H-2 ONR 5252.216-9706 - LEVEL OF EFFORT (DEC 88)

(a) The Contractor agrees to provide the total level of effort specified in the next sentence in performance of the work described in this contract. The total level of effort for performance of this contract shall be 11,520 total hours of direct labor for the Basic award, 17,280 total hours of direct labor for Option I, 21,120 total hours of direct labor, each, for Option II and Option III, and 17,280 total hours of direct labor for Option IV, if exercised, including subcontractor direct labor for those subcontractors specifically identified in the Contractor's proposal as having hours included in the proposed level of effort. A breakdown of labor categories and hours is set forth in paragraph (k) below.

(b) The level of effort for this contract shall be expended at an average rate of 960 hours per month for the basic award, 1,440 hours per month for Option I, 1,760 hours per month, each, for Option II and Option III, and 1,440 hours per month for Option IV, if exercised. It is understood and agreed that the rate of hours per month may fluctuate in pursuit of the technical objective, provided such fluctuation does not result in the use of the total hours of effort prior to the expiration of the term of the contract.

(c) The Contractor is required to notify the Contracting Officer when any of the following situations occur, or are anticipated to occur: If during any three consecutive months the monthly average is exceeded by 25% or, if at any time it is forecast that during the last three months of the contract less than 50% of the monthly average will be used during any given month; or, when 85% of the total level of effort has been expended.

(d) If, during the term of the contract, the Contractor finds it necessary to accelerate the expenditure of direct labor to such an extent that the total hours of effort specified would be used prior to the expiration of the term, the Contractor shall notify the Contracting Officer in writing, setting forth the acceleration required, the probable benefits which would result, and an offer to undertake the acceleration at no increase in the estimated cost or fixed fee together with an offer setting forth a proposed level of effort, cost breakdown, and proposed fixed fee for continuation of the work until expiration of the term hereof. The offer shall provide that the work proposed will be subject to the terms and conditions of this contract and any additions or changes required by then current law, regulations, or directives, and that the offer, with a written notice of acceptance by the Contracting Officer, shall constitute a binding contract. The Contractor shall not accelerate any effort until receipt of such written approval by the Contracting Officer. Any agreement to accelerate will be formalized by contract modification.

(e) The Contracting Officer may, by written order, direct the Contractor to accelerate the expenditure of direct labor such that the total hours of effort specified in paragraph (a) above would be used prior to the expiration of the term. This order shall specify the acceleration required and the resulting revised term. The Contractor shall acknowledge this order within five days of receipt.

(f) If the total level of effort specified in paragraph (a) above is not provided by the Contractor during the term of this contract, the Contracting Officer shall either (i) reduce the fixed fee of this contract as follows:

$$\text{Fee Reduction} = \text{Fixed Fee} \times \frac{(\text{Required LOE Hours} - \text{Expended LOE Hours})}{\text{Required LOE Hours}}$$

or (ii) subject to the provisions of the clause of this contract entitled "Limitation of Cost," require the Contractor to continue to perform the work until the total number of hours of direct labor specified in paragraph (a) shall have been expended, at no increase in the fixed fee of this contract.

(g) In the event the government fails to fully fund the contract in a timely manner, the term of the contract may be extended accordingly with no change to cost or fee. If the government fails to fully fund the contract, the fee will be adjusted in direct proportion to that effort which was performed.

(h) Notwithstanding any of the provisions in the above paragraphs, the Contractor may furnish hours up to five percent in excess of the total hours specified in paragraph (a) above, provided that the additional effort is furnished within the term hereof, and provided further that no increase in the estimated cost or fixed fee is required, and no adjustment in the fixed fee shall be made provided that the Contractor has delivered at least 95% of the level of effort required in paragraph (a) above.

(i) It is understood that the mix of labor categories provided by the Contractor under the contract, as well as the distribution of effort among those categories, may vary considerably from the initial mix and distribution of effort which was estimated by the government or proposed by the Contractor.

(j) Nothing herein shall be construed to alter or waive any of the rights or obligations of either party pursuant to the Clause entitled "Limitation of Costs" or "Limitation of Funds," either of which clauses as incorporated herein applies to this contract.

(k) The anticipated breakdown by labor category of the total level of effort is as follows:

Small business concern means a concern, including its affiliates, that is independently owned and operated, not dominant in the field of operation in which it is bidding on Government contracts, and qualified as a small business under the criteria in 13 CFR part 121 and the size standard in paragraph (c) of this clause.

(b) If the Contractor represented that it was a small business concern prior to award of this contract, the Contractor shall rerepresent its size status according to paragraph (e) of this clause or, if applicable, paragraph (g) of this clause, upon the occurrence of any of the following:

(i) Within 60 to 120 days prior to the end of the fifth year of the contract; and

(ii) Within 60 to 120 days prior to the exercise date specified in the contract for any option thereafter.

(c) The Contractor shall rerepresent its size status in accordance with the size standard in effect at the time of this rerepresentation that corresponds to the North American Industry Classification System (NAICS) code assigned to this contract. The small business size standard corresponding to this NAICS code can be found at

<http://www.sba.gov/services/contractingopportunities/sizestandardsttopics/>.

(d) The small business size standard for a Contractor providing a product which it does not manufacture itself, for a contract other than a construction or service contract, is 500 employees.

(e) Except as provided in paragraph (g) of this clause, the Contractor shall make the rerepresentation required by paragraph (b) of this clause by validating or updating all its representations in the Online Representations and Certifications Application and its data in the Central Contractor Registration, as necessary, to ensure they reflect current status. The Contractor shall notify the contracting office by e-mail, or otherwise in writing, that the data have been validated or updated, and provide the date of the validation or update.

(f) If the Contractor represented that it was other than a small business concern prior to award of this contract, the Contractor may, but is not required to, take the actions required by paragraphs (e) or (g) of this clause.

(g) If the Contractor does not have representations and certifications in ORCA, or does not have a representation in ORCA for the NAICS code applicable to this contract, the Contractor is required to complete the following rerepresentation and submit it to the contracting office, along with the contract number and the date on which the rerepresentation was completed:

Offerors shall examine each part and provide the requested information in order to determine Cost Accounting Standards (CAS) requirements applicable to any resultant contract.

If the offeror is an educational institution, Part II does not apply unless the contemplated contract will be subject to full or modified CAS coverage pursuant to 48 CFR 9903.201-2(c)(5) or 9903.201-2(c)(6), respectively.

I. DISCLOSURE STATEMENT—COST ACCOUNTING PRACTICES AND CERTIFICATION

(a) Any contract in excess of \$500,000 resulting from this solicitation will be subject to the requirements of the Cost Accounting Standards Board (48 CFR Chapter 99), except for those contracts which are exempt as specified in 48 CFR 9903.201-1.

(b) Any offeror submitting a proposal which, if accepted, will result in a contract subject to the requirements of 48 CFR Chapter 99 must, as a condition of contracting, submit a Disclosure Statement as required by 48 CFR 9903.202. When required, the Disclosure Statement must be

submitted as a part of the offeror's proposal under this solicitation unless the offeror has already submitted a Disclosure Statement disclosing the practices used in connection with the pricing of this proposal. If an applicable Disclosure Statement has already been submitted, the offeror may satisfy the requirement for submission by providing the information requested in paragraph (c) of Part I of this provision.

Caution: In the absence of specific regulations or agreement, a practice disclosed in a Disclosure Statement shall not, by virtue of such disclosure, be deemed to be a proper, approved, or agreed-to practice for pricing proposals or accumulating and reporting contract performance cost data.

(c) Check the appropriate box below:

(1) *Certificate of Concurrent Submission of Disclosure Statement.* The offeror hereby certifies that, as a part of the offer, copies of the Disclosure Statement have been submitted as follows:

(4) *Certificate of Interim Exemption*. The offeror hereby certifies that (i) the offeror first exceeded the monetary exemption for disclosure, as defined in (3) of this subsection, in the cost accounting period immediately preceding the period in which this offer was submitted and (ii) in accordance with 48 CFR 9903.202-1, the offeror is not yet required to submit a Disclosure Statement. The offeror further certifies that if an award resulting from this proposal has not been made within 90 days after the end of that period, the offeror will immediately submit a revised certificate to the Contracting Officer, in the form specified under paragraph (c)(1) or (c)(2) of Part I of this provision, as appropriate, to verify submission of a completed Disclosure Statement.

Caution: Offerors currently required to disclose because they were awarded a CAS-covered prime contract or subcontract of \$50 million or more in the current cost accounting period may not claim this exemption (4). Further, the exemption applies only in connection with proposals submitted before expiration of the 90-day period following the cost accounting period in which the monetary exemption was exceeded.

**SECTION M
EVALUATION FACTORS FOR AWARD**

M-1 EVALUATION

Award will be made to that offeror whose proposal is determined to be the best value to the Government, proposed cost and other factors considered. The Government reserves the right to make award to other than the low offeror. The technical considerations are more important than the cost factor. The closer the technical scores of the various proposals are to one another, the more important the cost considerations become. The Technical and Cost factors are each more important than the Small Business Participation factor.

M-2 EVALUATION FACTORS FOR AWARD

Proposals will be evaluated in accordance with the following criteria. The technical factor is more important than the cost factor. The Personnel Qualifications are more important than the Company Technical Experience, which is of greater weight than Management.

M-2-1. TECHNICAL/MANAGEMENT

(1) PERSONNEL QUALIFICATIONS

The proposed personnel will be evaluated on the experience and qualifications of the proposed personnel relevant to the proposed task; the quantity and quality of the Offeror's corporate experience relevant to the proposed task; and the previous experience of the personnel including the degree to which they meet the requirements set forth in the Personnel Qualifications.

(2) COMPANY TECHNICAL EXPERIENCE

The proposals will be evaluated on the offerors technical history and experience based upon its knowledge and understanding of each of the required task areas described in the Statement of Work.

(3) MANAGEMENT

The offeror's management will be evaluated based on their capability and suitability for performing under the required task areas in the Statement of Work.

M-2-2 COST TO THE GOVERNMENT

Proposed estimated cost to the Government. The Government may adjust the proposed cost for purposes of evaluation based upon an evaluation of cost realism. Cost Realism means that the costs in an offeror's proposal are realistic for the work to be performed; reflect a clear understanding of the requirements; and are consistent with the various elements of the offeror's

technical proposal. The cost realism evaluation includes an analysis of the adequacy of the hours, labor mix, and other direct costs to perform the work as proposed in the technical proposal as well as the proposed labor and indirect rates. It also includes evaluation of the likelihood that the risks inherent in the offeror's technical understanding will result in higher actual costs than anticipated.

M-2-3 SMALL BUSINESS PARTICIPATION

(a) The extent of participation of small businesses and historically black colleges or universities and minority institutions in performance of the contract will be evaluated on the basis of the proposed extent of participation of such firms in terms of the value of the total acquisition and the complexity and variety of the work such firms are to perform.

M-3 FAR 52.217-5 - EVALUATION OF OPTIONS (JUL 1990)

Except when it is determined in accordance with FAR 17.206(b) not to be in the Government's best interests, the Government will evaluate offers for award purposes by adding the total price for all options to the total price for the basic requirement. Evaluation of options will not obligate the Government to exercise the option(s).

STATEMENT OF WORK

1.0 INTRODUCTION

The Tactical Electronic Warfare Division (TEWD) is seeking contractor assistance in a variety of disciplines related to computer simulation of Electronic Warfare (EW) applications. TEWD areas of interest include engineering development, computer simulation and modeling.

The contractor shall provide research and engineering services in support of the following basic task areas:

- Task I - Electronic Warfare Analysis
- Task II - Computer Modeling and Simulation Development

2.0 SCOPE

TEWD is tasked with developing simulations of naval EW systems, anti-ship threats, and military communication systems to support the development, fielding and testing of electronics and weapons systems. In support of these goals three specific tools that are currently being developed and supported, the Interactive Scenario Builder, Counter Radio-Controlled Improvised Explosive Devices (RCIED) Electronic Warfare (CREW) Modeling And Simulation Tool (C-MAST) program and SIMDIS 3-D Analysis and Display Toolset.

Builder is an interactive, three dimensional, Radio Frequency (RF) Tactical Decision Aid (TDA). The latest version of Builder is targeted toward war fighters, providing insight into the complex and highly dynamic RF environment within which they operate. Builder is a computer simulation tool that provides insight into and visualization of the RF capabilities of platforms in addition to providing geo-spatial and temporal situation awareness. Builder models communication and RADAR systems by calculating one-way and two-way RF propagation loss. It incorporates complex antenna pattern and RADAR cross section (RCS) pattern data as well as the effects of meteorology, terrain, environment, and counter-measures when computing power level results.

The SIMDIS toolset is designed for Windows, Linux, and Sun workstations. It provides powerful cross platform capability for interactively visualizing and analyzing simulations and field test data from weapons ranges from any and every viewpoint. SIMDIS provides either a 2-D or a 3-D display of information such as the interactions of sensor systems with targets, countermeasures, and the environment. The SIMDIS toolset includes custom tools for interactively analyzing and displaying data for equipment modes, spatial grids, ranges, angles, antenna patterns, line of sight and RF propagation.

The C-MAST Program focuses on providing an EW analysis and visualization tool for the war-fighter using the Builder tool set. The C-MAST system allows the simulation, prediction and visualization of the effectiveness of CREW jammers, communications systems, and disruption devices and techniques by war-fighters in the field to counter radio controlled improvised explosive devices and to predict effects on lines of communications. This powerful tool is used for force protection techniques development, test and evaluation, mission planning and post-mission analysis.

The Contractor shall provide, on a level-of-effort basis, the man-hours of scientific, technical, and engineering support stated in the personnel qualification to support research and development, test and evaluation (RDT&E) of programs such as Builder, C-MAST and SIMDIS. The development work performed under this contract will be unclassified but some completed simulations and some of the data processed will be classified at the SECRET level. Contractor personnel shall also be required to attend classified meeting at various government facilities such as; NRL, Washington DC (NRL-DC), NRL, Monterey California (NRL-MRY), Naval Air Warfare Center-Weapons Division (NAWC-WD), China Lake and Point Mugu California and others as required by NRL for program support.

3.0 TASK DESCRIPTIONS

3.1 TASK I - ELECTRONIC WARFARE ANALYSIS

The purpose of this task is to provide R/DT&E of Communication, RADAR, and Jammer signal propagation, threat and electromagnetic environment (EME) characterization, and CREW device analysis. This task will also involve R/DT&E into multiple theories that include physical destruction and electronic manipulation to counter IED and RADAR threats. Tasks will include research and modeling of electronic warfare areas such as; RADAR cross section, complex antenna propagation patterns, radio wave propagation, free space signal loss, and jamming techniques. The Contractor shall evaluate multi-spectral non-lethal measures to counter current and future foreign and domestic weapons systems that could threaten U.S. naval systems. Studies will require access to data classified at the SECRET level. The Contractor shall study the types of threats and the potential to deploy these threats against U.S. forces and the effectiveness of U.S. forces to detect and counter these threats through the coordination of traditional lethal defense measures with non-lethal actions. The Contractor may also provide analysis of Systems Under Test (SUT) at test site ranges for possible interference with FAA service volumes.

3.2 TASK II - COMPUTER MODELING AND SIMULATION DEVELOPMENT

In support of TEWD research programs, the Contractor shall provide experienced engineers and computer scientists to assist in the development of high fidelity simulations that accurately represent the performance of EW and weapon systems in a complex electromagnetic environment. The Contractor shall supply personnel and license-free government-off-the-shelf (GOTS) technologies to create new capabilities within the Builder and SIMDIS applications and associated frameworks and tools. The Contractor shall also support verification and validation efforts for the simulations. The Contractor shall also support the transition of these programs to various Navy and DoD activities. The Contractor shall support activities such as:

1. Radio frequency/electromagnetic modeling and simulation for operational, analytical, and training systems.
2. Verification, validation and accreditation of DoD modeling and simulation systems.
3. High-resolution antenna modeling and measurements.
4. Development of high fidelity models for threats and EA systems.
5. Software development for synthetic environments, geospatial data, 3D visualization, and graphical user interface development.
6. Software and hardware systems engineering and integration for large-scale, distributed events, and training events.
7. Program Management.
8. DoD software design and documentation.
9. User meetings, testing events, and training events.
