Contracting Office Address

Department of the Navy, Office of Naval Research, Naval Research Laboratory, 4555 Overlook Ave. S.W., Washington, DC, 20375, UNITED STATES

Description

The Naval Research Laboratory (NRL) has a requirement for three tasks at its Multi-Function Electronic Warfare Facility located at the Chesapeake Bay Detachment at Chesapeake Beach, Md. A site visit to inspect the facility is anticipated, and details will be included in the solicitation. The first task of maintenance and modifications will involve inspecting the existing mechanical and electrical connections and ordering and replacement of component

mechanical and electrical connections for the existing trailers which comprise the facility. Because this task could involve emergency work, the successful offeror must be available, have proper security clearances, be located a reasonable distance from the facility, and have available equipment and ample mechanics certified in multiple trades available on an on call basis 24 hours per day, 7 days per week.

The second task involves performing major modifications, including disassembly of a transmit or receive array pallet from its present location on either the transmit or receive shelter, and preparing it for shipping for array repair or modifications. This may include removal and disassembly of radar absorbing material. Upon receipt of the modified array pallet, the contractor shall reinstall the array pallet on the transmit or receive shelter flange. It is anticipated that four removals and re-assemblies will occur during each calendar year

The third task involves performing special supplemental adaptive work, including but not limited to: adding or moving an antenna, adding new cable or connections, mounting new equipment, performing seasonal preventative conditioning, adding modified weldments both in steel and aluminum, modifying components by cutting, drilling, or tapping, and preparing and painting all or any part of the facility. Effort under this task may occur up to twelve times per year.

It is contemplated that one award will be made resulting from this solicitation, and that the successful offeror will perform all three tasks. The successful offeror will be required to provide materials, a staff of skilled mechanics with skills in all trades of mechanical and electrical manufacturing and assembly, including electrical and electronic assemblers, steel and aluminum welders, and have a Maryland Profession Engineer on staff. The successful offeror will also be expected to provide some equipment, such as a 100' boom, a 85 ton crane and aerial work platforms as required.

NRL uses Electronic Commerce (EC) to issue Requests for Proposals (RFPs) and amendments to RFPs. Paper copies of the RFP will not be provided. All responsible sources may submit a proposal, which will be considered by the agency. This requirement is full and open competition. This solicitation and other business opportunities for NRL are available at our website:
<http://heron.nrl.navy.mil/contracts/listrfp.htm>

The actual closing date for proposals will be stated in the solicitation when issued. See Numbered Note(s) 12 and 26.
